Project Proposal 2: Urban Spark Electrical

1. Organization Overview:

- **Name:** Urban Spark Electrical
- **History:** Urban Spark Electrical is a family-owned business that has been servicing the Johannesburg metropolitan area for over 15 years. Founded by master electrician Johan van der Merwe, the company has grown from a one-man operation to a team of 7 qualified electricians. They are known for their reliability, high-quality workmanship, and transparent pricing.
- **Mission:** To provide safe, reliable, and professional electrical services to homes and businesses, ensuring the safety and satisfaction of our clients.
- **Vision:** To be the most trusted and recommended electrical service provider in Johannesburg, known for our integrity and technical excellence.
- **Target Audience:** Homeowners needing repairs or installations, property developers, and small to medium-sized business owners requiring commercial electrical work.

2. Website Goals and Objectives:

- **Goal 1:** Generate Qualified Leads. The primary goal is to generate at least 15 new client enquiries per month through the website contact forms.
- **Goal 2:** Build Trust and Credibility. To showcase the company's experience, qualifications, and testimonials to convert visitors into clients.
- **Goal 3:** Provide Key Information. To clearly list services and service areas to pre-qualify leads and reduce unnecessary phone calls.
- **KPIs:** Number of form submissions on the contact and enquiry pages, bounce rate, and average session duration.

3. Current Website Analysis (if applicable):

The existing website is outdated, poorly designed, and not mobile-friendly.

- **Weakness:** The design looks unprofessional, which undermines trust in the company.
- **Weakness:** It is not responsive, making it difficult to use on a smartphone.
- **Weakness:** The site has very poor on-page SEO (missing title tags, meta descriptions), meaning it doesn't rank well on search engines like Google.
- **Improvement:** A modern, responsive, and SEO-optimized website will present a professional image and make it easy for potential customers to find the company online.

4. Proposed Website Features and Functionality:

- **Homepage:** A professional hero image of an electrician, a strong value proposition ("Safe, Reliable Electrical Services"), a brief overview of key services, trust signals (e.g., certifications), and a prominent "Get a Quote" button.

- **About Us:** The company's history, mission, team members (with photos and bios), and qualifications.
- **Services (services.html):** A detailed list of services (e.g., residential, commercial, solar installation, backup power). Each service should have a brief description.
- **Enquiry (enquiry.html):** A form for clients to request a quote for a specific service. This form will include fields for the type of service, a brief description of the job, and a preferred date.
- **Contact (contact.html):** A page with the company's physical address, a map, contact phone numbers, an email address, and a general enquiry form.

5. Design and User Experience:

- **Color Scheme:** A professional and trustworthy palette. Primary: #1B3A4B (Dark Blue) to convey professionalism and reliability. Secondary: #F4F4F4 (Light Grey). Accent: #F39C12 (Warm Yellow) for calls to action and electrical motifs.
- **Typography:** A clean, professional, and highly readable sans-serif font like 'Montserrat' or 'Roboto'.
- **Layout:** A clear, logical, and scannable layout designed for quick navigation. The "Services" and "Get a Quote" pathways will be the most prominent features.

· Low-Fidelity Wireframes:

- **Homepage:** Navigation bar at the top, a large hero image with a headline "Your Trusted Electrical Partner" and a "Get a Quote" button. Below, three service icons with short descriptions. Further down, a section for customer testimonials. Footer with contact info, social links, and a copyright notice.
- **Services:** A page listing all services in a grid or list format with icons and brief descriptions.
- **Enquiry:** A simple, clean page with a form (Name, Email, Phone, Service (dropdown), Message, Preferred Date).

6. Technical Requirements:

- **Domain:** The existing domain, urbanspark.co.za, will be retained and renewed.
- **Hosting:** A reliable hosting plan will be sourced.
- **Programming Languages:** The website will be developed using standard HTML5, CSS3, and JavaScript.

7. Timeline and Milestones:

- **Week 1-2 (Part 1):** Research, content gathering, and creation of the HTML structure for all five pages.
- **Week 3-4 (Part 2):** Implementation of CSS styling for desktop and mobile responsiveness.
- **Week 5-6 (Part 3):** Implementation of JavaScript functionality (form validation, interactive map) and SEO optimization.

8. Budget:

- **Domain Renewal:** R150 / year
- **Web Hosting:** R1,800 / year (business shared hosting)
- **Development:** R18,000 (estimated)
- **Maintenance:** R750 / month (estimated)
- **Total First Year Estimate:** R19,950
